VETERINARY MEDICINE × DATA SCIENCE

Shared data to move veterinary AI forward

VETNET is building an ecosystem of live benchmarks for AI in veterinary medicine — *any animal, any disease, any task*. Launched at a 2026 Cornell Thought Summit, it unites universities, industry and regulators to create open, well-documented datasets, starting with CT and radiograph imaging.

ABOUT

An open network for veterinary data and the people who use it

OUR MISSION

Why VETNET exists

VETNET builds an ecosystem of live benchmarks for AI in veterinary medicine — for any animal, any disease, any task.

Veterinary data covers companion animals and food-producing species, comes in many formats, and faces different legal and regulatory barriers than human health data, with no central body to standardize it. VETNET brings veterinary medicine, computer science, ethics and law together to create standardized, high-quality datasets and the benchmarks that let the field measure real progress — for animals, veterinary professionals, One Health and society.

Open by default
Data and benchmarks shared as openly as privacy and ownership allow.

Rigorous
Consistent standards, clear documentation and fair evaluation.

Collaborative
Built jointly by academia, clinics, industry and regulators.

Our story so far

AUGUST 2025
Project funded
Cornell's Center for Data Science for Enterprise & Society and AI Initiative fund the planning project.

JUNE 9–11, 2026
Thought Summit
Experts from 20 organizations meet at Cornell to launch VETNET.

OCTOBER 2026
Whitepaper published
Our founding whitepaper appears on arXiv with 40 co-authors.

NEXT
First datasets
Open CT and radiograph datasets and the first benchmarks. [Target date]

FAQ

Frequently asked questions

How can I get in touch with VETNET about publicity, media or collaborations?

We'd love to hear from you. Email [contact@vetnet.org] or use the contact form, and the right member of the team will get back to you.

Contact us

How can I stay up to date on what's happening at VETNET?

Subscribe to our news updates, or follow VETNET on LinkedIn for announcements, events and new datasets.

Subscribe to news | Follow on LinkedIn

How can I get more involved with VETNET?

Check out our Opportunities page to join a working group, download data or contribute data of your own.

What has VETNET accomplished so far?

We launched at the June 2026 Cornell Thought Summit, built a community of 40 collaborators from 20 organizations, and published our founding whitepaper, "VETNET: Assembling Benchmark Datasets for AI-Driven Veterinary Innovation" (arXiv, 2026).

© 2026 VETNET · Sponsored by the Cornell AI Initiative

PEOPLE

The people behind VETNET

RESEARCH

Any animal, any disease, any task

VETNET's research has two goals: give researchers the veterinary data they need to do good work, and give the field live benchmarks to measure that work against.

Our research

1 Providing data for good research

Veterinary data spans many species, comes in many formats, and faces different legal and regulatory barriers than human health data. We work with partners to collect, de-identify and document it to one shared standard, so researchers can spend their time on science rather than data wrangling.

2 Benchmarks, competitions and papers

VETNET is designed as an ecosystem of *live* benchmarks: tasks that grow with new data, open competitions that compare methods fairly, and published results that make progress in veterinary AI visible to everyone.

Where we're starting

Our first focus is medical imaging in DICOM format. We will extend to other data types as the initiative grows.

NOW

CT scans DICOM

Radiographs DICOM

COMING SOON

Free-text clinical notes

Tabular records

And more

Where it began

The Cornell Thought Summit, June 9–11, 2026 · College of Veterinary Medicine, Ithaca, NY

DAY 1 · JUNE 9

What is — and what can become

Keynotes from P-J Noble (Liverpool) on veterinary benchmarks today, Heather Whitney (Chicago) on lessons from human medical imaging, and Kilian Weinberger (Cornell) on datasets in the age of foundation models.

DAY 2 · JUNE 10

Designing VETNET 1.0

Group sessions on what VETNET should be, panels on ethical and legal compliance and on trustworthy benchmark repositories, and a first draft of the ecosystem framework.

DAY 3 · JUNE 11

Whitepaper and public panel

Synthesis and whitepaper drafting, then a public panel on the veterinary AI ecosystem.

Publications by VETNET

Whitepaper arXiv:2610.14149 · October 2026 · 40 co-authors from 20 organizations

Read on arXiv Cite

VETNET: Assembling Benchmark Datasets for AI-Driven Veterinary Innovation

Drafted at the June 2026 Cornell Thought Summit, the whitepaper makes the case for VETNET — an ecosystem of live

benchmarks for AI in veterinary medicine — and sets out how academia, industry and regulators can build standardized, high-quality veterinary datasets together. [Replace with 2–3 sentences from the abstract.]

There's a place for you in VETNET

Undergraduates, graduate students, postdocs, faculty, clinicians and industry researchers all help shape VETNET. Choose one or more ways to take part — each one sends you its own next steps automatically.

Take the community survey | Sponsorship

1. Choose how you'd like to take part

Select any combination.

- [ ] **Receive VETNET updates and announcements**
  News, events and new datasets in your inbox.
  ⚡ **Automatic next step:** Welcome email with the latest update; you stay on the e-list.

- [ ] **Join community events, convenings or working groups**
  Meetings, workshops and the MVP, Repos, Governance and Stakeholder teams.
  ⚡ **Automatic next step:** Calendar of upcoming events and a working-group interest form; team leads are notified.

- [ ] **Use VETNET benchmark datasets**
  For research or model development.
  ⚡ **Automatic next step:** Links to the dataset catalog, documentation and free member sign-up, plus the restricted-access form.

- [ ] **Contribute data or datasets**
  Share imaging, clinical records or other veterinary data.
  ⚡ **Automatic next step:** Data contribution intake form and our data-protection overview; the data team follows up.

- [ ] **Contribute your expertise**
  Veterinary science, animal health, computer science and more.
  ⚡ **Automatic next step:** Short expertise-profile form so we can match you with the right team.

- [ ] **Contribute to validation**
  Test models in real-world clinical settings.
  ⚡ **Automatic next step:** Validation-site questionnaire (setting, species, caseload).

- [ ] **Contribute to technical infrastructure & platform development**
  Pipelines, repositories and benchmark tooling.
  ⚡ **Automatic next step:** Invitation to the VETNET GitHub and our contributor guide.

- [ ] **Help shape data governance, ethics & policy**
  Data sharing terms, ethics and regulatory questions.
  ⚡ **Automatic next step:** Introduction to the Governance team and its current open questions.

- [ ] **Contribute to education, training & mentorship**
  Teaching, tutorials and mentoring students.
  ⚡ **Automatic next step:** Education and mentorship interest form.

- [ ] **Facilitate partnerships or funding opportunities**
  Connect VETNET with organizations, funders or sponsors.
  ⚡ **Automatic next step:** Sent to the contact PI, with our sponsorship information.

Contributing data? Here's how we protect it

Clinics, hospitals, universities and companies can contribute data to grow the collection. Donors earn a Data donor badge on the People page and are credited in every dataset's documentation, and can track their datasets from the members area.

Talk to us about donating

Read our data protections

PLANNED PROTECTIONS [TO CONFIRM]

De-identification
Owner and patient details removed before any data is shared.

Controlled access
Sensitive datasets released only to approved members.

Data use agreements
Clear terms for how restricted data may be used.

Credit for donors
Donors acknowledged on the site and in documentation.
